I am writing to apply for visa for my post graduate studies in Computers from an undefined university in Canada. My Bachelor's degree in the same field has laid a strong foundation on which I can build my career in Computers. Furthermore, I am excited to experience the Canadian culture and take part as an active member of their social life. I am confident that I can complete my post graduate studies successfully, contribute significantly to the academic studies in the university, and efficiently take up any projects that I am assigned.

During my studies, I also aim to develop a wide range of skills that would be beneficial throughout my professional career. Aside from that, I intend to develop communication, networking and research skills in order to take full advantage of this opportunity in Canada.

I will be completing my course with an ethical approach. I intend to abide by the rules and regulations which are in place and maintain a positive relationship with the faculty staff and other students.

Finally, I hope to make the most of my time and experience living in Canada as a student. By doing so, I will be able to grow as an individual and contribute towards the success of university and the betterment of society.

Thank you for your time and consideration.
